

Size Guide for *Size-Fit™* rings

To help you as much as possible when buying your CHIMENTO rings, we have created this short guide that enables you to determine your size in just a few minutes.

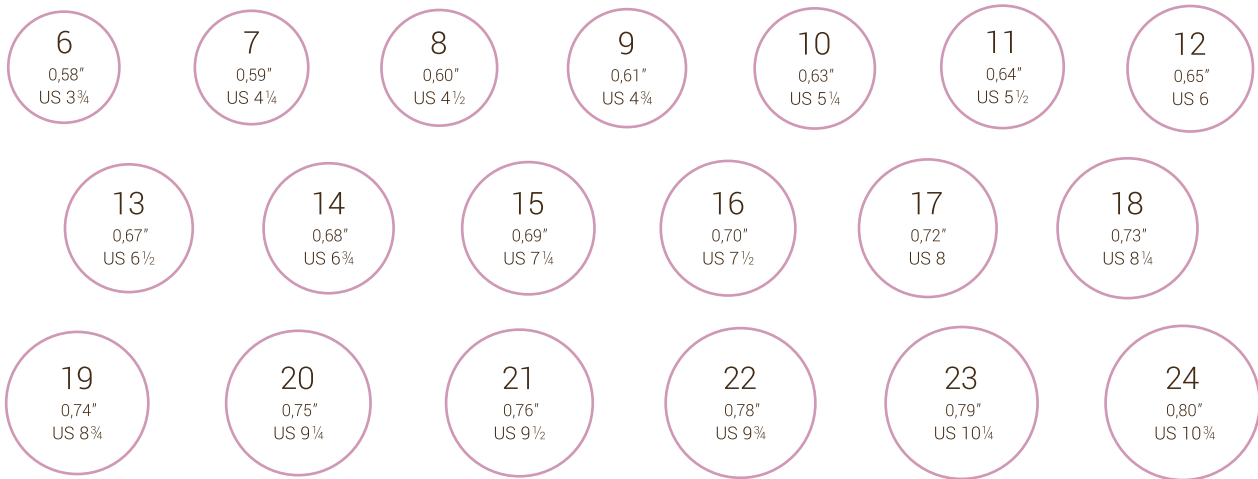

The first thing you need to do is print this page and, using a ruler, verify that our templates are in an exact correct unit of measurement. Therefore, please make sure that the box "Adapt to format" is not ticked before you print.

MEASURE BY COMPARISON WITH ONE OF YOUR RINGS

If you don't know your ring size, you can easily find it by comparing the circumference of a ring you already own.

1. Find a ring that perfectly fits the finger you'll want to wear your new CHIMENTO ring on.
2. Place the ring on the circle that best fits its circumference. The inner edge of your ring should correspond to the outer edge of the printed circle.
3. Well done, you have detected your size! The large number is your CHIMENTO ring size, while the smaller numbers refer to the circumference (in inches) and the size in your country.

MEASURE USING THE PRINTABLE RULER

1. Carefully cut out the ruler along its circumference and puncture it along the vertical black line next to the scissors symbol.
2. Wrap the ruler around your finger, making sure you insert the tip into the hole you have just created so that the numbers become visible.
3. Place the ruler on the widest part of your finger and tighten it. For best results, the ruler should adhere to your finger as much as possible.
4. The number that appears on the outside of the hole is your CHIMENTO ring size.

Size-Fit™ rings Size Chart

Some CHIMENTO rings feature the patented *Size-Fit™* system that adapts to the circumference of individual fingers and extends to a range of up to five sizes. For most comfortable wearing, we advise you to select the Size-Fit™ size that is closest to your standard ring size, as shown in the following Size Chart.
